UF Information Technology

Internship Title: Quality Testing Internship
Department: Applications Development and Integrations
Work Location: 800 SW 2nd Avenue Gainesville, FL 32601

Brief Description of Internship:

This internship position will assist testing analysts with developing, performing and managing testing of ongoing software and hardware projects.

Specific Duties:

- Participate in project testing and planning sessions
- Create, update, and perform test scripts based on project requirements
- Track, report, and retest defects found
- Assist identifying processes that can be automated for more efficient testing

Hours Per Week: 10 - 15 hours per week

Qualifications Needed:

- Knowledge of the Software Development Life Cycle
- Strong analytical abilities and a desire to "break" software, then help fix it
- Strong writing and communication skills

Learning Objectives:

- Demonstrate openness, inclusiveness, sensitivity, and the ability to interact respectfully with all people and understand individuals' differences in order to design and manage testing to ensure functionality meets project requirements
- Learn, assess, and implement quality in project deliverable.
- Develop interpersonal skills which will enable them to build professional relationships, work within a team structure, and to manage conflict in the workplace
